

ANISHKA VERMA

New Delhi, India

+91 7982531063 anishka.2203@gmail.com linkedin.com/in/anishka-verma github.com/anishka22m

Education

University School of Information Communication and Technology, GGSIPU August 2024 – July 2026
Master of Computer Applications (Software Engineering) CGPA: 9.1

Maharaja Surajmal Institute December 2021 – July 2024
Bachelor of Computer Applications (Minor in Data Science) CGPA: 9.64

Experience

Implementation and RPA Intern — SirionLabs October 2025 – Present
Intern | Delhi NCR

- **Built** Python Playwright automations that streamlined repetitive configuration steps and reduced manual effort by about 20 percent.
- **Designed and implemented** CLM workflows by mapping logic paths, field rules, and configuration requirements to speed up deployment.
- **Developed** reusable components, consistent logging, and clear documentation that improved script stability and cut review time by roughly 15 percent.

Data Science Intern — Qdegrees February 2025 – May 2025
Intern | Remote [Link](#)

- **Designed** and deployed an ML-driven sentiment analysis system (**85%+ accuracy**) to enhance client service feedback intelligence.
- **Built an emotion-detection pipeline** to process 3,500+ text entries, translating technical outputs into actionable business insights.
- Improved keyword extraction and interpretability, increasing feedback accuracy by **30–35% across 40K+ call transcripts**, while collaborating with analytics and client teams to align outputs with business KPIs.

Projects

NeuroLearn | Agentic AI(using OpenAI API), Javascript, HTML/CSS [Link](#)

- **Built a platform with 3+ AI-driven features** designed for neurodivergent students using the **OpenAI API** to deliver personalized learning support and accessibility.
- **Developed an agentic chatbot for doubt solving**, an AI curriculum assistant for smart study plans, a text-to-speech interface for dyslexic users, and a gamified leaderboard to enhance engagement.

MoodSync | Python, Flask, OpenCV, Keras, HTML/CSS [Link](#)

- **Built and deployed a Flask web app** integrating OpenCV and Keras for real-time emotion recognition, powering personalized music recommendations.
- **Designed RESTful APIs and optimized backend pipeline**, ensuring low-latency media streaming and smooth user experience.

Stress & Anxiety Analysis via Lifestyle Data | Python, NumPy, Pandas, Matplotlib, Seaborn [Link](#)

- Analyzed **500+ lifestyle data points from 100+ participants** to map patterns between sleep quality, activity frequency, and stress levels, and **trained ML models** to extract key predictors — anxiety symptoms contributed 30% and peer support 10% to overall stress risk.

Technical Skills

Programming Languages: Python, C/C++, Java

Tools: MS Excel, Tableau, Google Analytics

Database: SQL (MySQL)

Frameworks & Libraries: Flask, NumPy, Pandas, sklearn, TensorFlow, HTML + CSS

Certifications and Achievements

- **Consistently** ranked among the **top 10 students** in highly competitive cohorts of 240 (BCA) and 120 (MCA), recognized for academic excellence and consistent performance.
- **Participated in 5+ hackathons and secured 2nd Place at Hack-Verse** held at Sri Venkateswara College (DU), competing against 50+ teams.
- **Codolio: Solved 220+ problems** in DSA; active on LeetCode (max rating: **1494**) and CodeForces (max rating: **984**); 15+ contest participations.
- **Leadership roles:** President, Girl Up Union (MSI) — led 100+ members in social initiatives; Hackathon Organizer (Codevalds) — 60+ teams; Chief Advisor, Avensis Tech Fest 2024 — curated events for 2k–3k participants.
- **Certifications:** Forage — Data Analytics and Visualization (Accenture, Aug 2023); Adroid Connectz, SSCBS DU — Research Methods & Data Science (Sep 2023); IBM SkillsBuild — Data Analytics: Turning Data into Decisions using Python (Jan 2025).
