National Service Scheme, MSI

New Delhi

- **Built and shipped** a production-ready web portal (events, attendance, profiles) using JavaScript & SCSS.
- **Mentored** 5 developers through pull requests and code reviews, improving deployment efficiency by 20%.

Projects

Code Quest | *React, D3.js, Node.js, Express.js, PostgreSQL, Firebase, Monaco Editor*

[Link](#)

- **Spearheaded development of a full-stack learning platform** with algorithm visualizations, AI study planner, and collaboration features, improving comprehension and peer engagement across 5+ integrated tools.
- **Implemented scalable backend services and modular front-end components**, ensuring smooth system integration and extensibility.

HarmoniX | *Deep Learning(RNN), React, D3.js, Node.js, Express, PostgreSQL, MusicGen*

[Link](#)

- **Engineered a custom AI-powered music application** combining prompt-based generation, real-time pitch/timing analysis, and practice tools to automate and enhance user workflows.
- **Integrated and fine-tuned MusicGen with LoRA** on custom datasets, reducing output errors by 60% and improving alignment with user input.

NeuroLearn | *Agentic AI(using OpenAI API), HTML, CSS, JavaScript*

[Link](#)

- **Crafted a platform** with 3+ AI-driven features designed for neurodivergent students using OpenAI API.
- **Designed** an agentic chatbot for doubt solving, AI curriculum assistant for smart study plans, text-to-speech interface for dyslexic users, and gamified leaderboard to enhance engagement.
